THIS IS YOU:

You've got a coding playlist. Enough said. You know what works, but love to push the envelope. You don't see problems-you see challenges! You're a natural born leader, willing to take the bull by the horns and ride it down Main Street. You're comfortable collaborating and contributing with designers and project managers. Organized, check. Understandable, yup! Adaptable, of-course! Confident, hells yeah.

THIS IS THE ROLE:

As the Senior Front End Web Developer, you are responsible for coding, deploying, maintaining, and updating our clients' turn key digital systems including e-Commerce websites, eBlasts, Retail Kiosks, Site Plan tables with integrated functionality, and Tablet & App development. You will build and test robust, innovative, responsive, accessible, and informative websites and applications to ensure optimal performance, greater user experience, and visibility across multiple browsers/devices using on-trend technologies according to best practices. In a leadership role, you will support, instruct and mentor Junior Web Developers with website updates & eBlast developments.

THESE ARE YOUR SKILLS:

- Languages: HTML5, CSS3, JS
- Frameworks & Libraries: jQuery, Bootstrap, Angular or React, SaaS or Less
- Other: Adobe Creative Suite
- Knowledge of Version Control systems such as Git/GitHub or BitBucket
- Email coding, testing & development (MailChimp, Campaign Monitor)
- Experience with Website, eBlast and Kiosk development
- Experience with eCommerce web-based platforms
- Knowledge of IE9+, Safari, Firefox, iOS & Android browser specific compatibility issues
- Knowledge of testing methodologies & software development life cycle (SDLC)
- Marketing Automation Software
- Understanding of web analytics
- Real estate agency experience is a great asset
- Hardware and wiring knowledge considered an asset
